RE: AB 655 (Quirk) Rendering: inedible kitchen grease: additional fee

Dear Assemblymember Quirk,

The Association of Compost Producers (ACP) is a non-profit, 501(c)6, trade association of public and private organizations dedicated to increasing the quality, value and amount of compost being produced and used in California. We do this by promoting activities and regulations that build healthy soil, benefiting people and the environment. ACP members work and invest together to increase compost markets and improve compost product and manufacturing standards. The association also provides education and communication on compost benefits and proper use through support of scientific research, and legislation, aligned with developing and expanding quality compost markets.

ACP realizes that it is necessary to obtain fees to regulate various waste streams for the purposes of environmental protection of these potentially nuisance organic residuals. While we are not necessarily for more taxes on recycling businesses, we support the intent of this new law.

For these reasons, we urge your support on this important legislation. Should you have any questions, please contact our legislative advocate, Kathryn Lynch, at 916-443-0202 or lynch@lynchlobby.com.

Sincerely,

Dan Noble, Executive Director
Association of Compost Producers

Summary: Current law transfers, with respect to the increase in gasoline excise taxes as a result of the elimination of the sales tax on gasoline, to the General Fund the revenues attributable to off-highway vehicles that would otherwise be deposited in the Off-Highway Vehicle Trust Fund. Current law requires the Controller to withhold \$833,000 from the monthly transfer, and transfer that amount to the General Fund. The moneys in the Off-Highway Vehicle Trust Fund are required to be used, upon appropriation, for specified purposes related to off-highway motor vehicle recreation. This bill would, on June 30, 2017, eliminate the requirement that the Controller withhold \$833,000 from the monthly transfer and transfer it to the General Fund and would thereby transfer this amount monthly to the Off-Highway Vehicle Trust Fund.

RE: HR 51 (Quirk) Relative to Compost Awareness Week (As Introduced May 2, 2016)

Dear Assemblymember Gordon,

The Association of Compost Producers (ACP) is a non-profit, 501(c)6, trade association of public and private organizations dedicated to increasing the quality, value and amount of compost being produced and used in California. We do this by promoting activities and regulations that build healthy soil, benefiting people and the environment.

The producers of compost in California heartily support House Resolution No. 51— Relative to Compost Awareness Week. For all of the reasons contained in HR 51 our business and municipal members and their customers and constituencies produce and use compost from the organic residuals that we all generate every day of the year. By returning these residuals back to the soil, we complete the cycle in our human economy, producing a valuable product that would otherwise be wasted. International Compost Awareness Week helps bring this central green business to the attention of all of us globally and in California, since we all participate in this renewable carbon cycle, with compost completing the cycle.

We thank Assemblymember Quirk for introducing HR 51, thereby underscoring the many environmental, economic and social benefits that compost will deliver to the state as outlined in this important resolution.

RE: SB 367 (Wolk) Agricultural lands: greenhouse gases (As Amended 5/6/15)

Dear Senator Wolk,

The Association of Compost Producers (ACP) is a non-profit, 501(c)6, trade association of public and private organizations dedicated to increasing the quality, value and amount of compost being produced and used in California. We do this by promoting activities and regulations that build healthy soil, benefiting people and the environment. ACP members work and invest together to increase compost markets and improve compost product and manufacturing standards. The association also provides education and communication on compost benefits and proper use through support of scientific research, and legislation, aligned with developing and expanding quality compost markets.

We would like to express our support for Senate Bill 367, a measure that would reduce on-farm greenhouse gas emissions or increase carbon storage in agricultural soils and woody biomass, or both.

ACP's mission is to support the education, research and public outreach of using recycled organics (aka compost, renewable carbon, compostable organics) to be beneficially used to build healthy, living, water efficient soils in California. This legislation is important because it would further support, ongoing, the dissemination of this important information to help build sustainable food production in our state. Compost use in agriculture is already one of many practices that has been demonstrated to reduce greenhouse gases by sequestering additional carbon in the crop or grassland. This legislation would therefore support the use of recycled organics on crops and rangelands, and therefore supports renewable carbon management, which is endorsed by the NRCS and USDA. ACP also supports the use of the CDFA Environmental Farming Advisory Panel, as composed and recommended in SB 367. In addition, since this Panel is charged with reviewing and overseeing the Governor's Healthy Soil Initiative Proposal, the use of the funds proposed in this legislation, being managed through this channel, makes good sense from both an environmental, industry and public oversight perspective.

For these reasons, we urge your support on this important legislation. Should you have any questions, please contact our legislative advocate, Kathryn Lynch, at 916-443-0202 or lynch@lynchlobby.com.
